START/LOW SPEED

Only the motor powers the whole car with electricity from the Hybrid Electric battery.*

NORMAL DRIVING

The engine and motor power the car together while the Hybrid Electric battery is charged.

HARD ACCELERATION

Petrol engine and electric motor provide maximum power together with supplemental electrical power from the HEV battery to the motor.

BRAKING

The energy that is generated from braking charges the battery.

STOPPED

The engine goes off to avoid wasting fuel.

*Toyota Hybrid Electric System will charge the Hybrid Electric battery automatically depending on the driving condition, weather and Hybrid Electric battery state of charge.

REINVENT YOUR HORIZON

1

High Efficiency

Save on fuel costs with Toyota's Hybrid Electric System, which reduces consumption by using the electric motor at low speeds.

4

Regenerative Braking

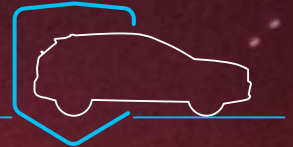

Toyota's self-charging hybrid system captures energy from braking to recharge the battery—no plug-in needed—keeping you powered without wasting energy.

2

Year-round Reliability

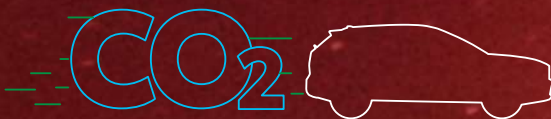

Drive with confidence, backed by an 8-year unlimited mileage warranty on key hybrid components, ensuring your vehicle stays reliable for years to come. (Optional extension available for years 9 and 10.)

**4TH GENERATION
HYBRID ELECTRIC
BATTERY**

5

Intelligent Technology

The 4th Generation Hybrid Electric System features improved battery longevity, efficient air filtration, and advanced cooling for superior performance and durability.

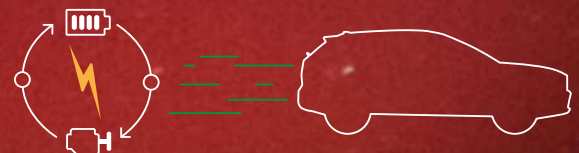

3

Better Emissions

Corolla Cross Hybrid Electric CO₂ Emissions: **98 g/km**

Toyota's hybrid system helps create a cleaner, more sustainable future by using less petrol and reducing your carbon footprint.

6

Dual Power

Experience the best of both worlds—electric and petrol power, working together for improved performance, with a lower centre of gravity for better handling and a more stable, comfortable ride.
